## 01/ SUMMARY

Senior Frontend Engineer with 6+ years building scalable, high-performance web applications across fintech, e-commerce, and healthcare. **Leads teams of 7+ engineers**, owns architecture and design systems, and has rebuilt legacy apps into modern SPA architectures with measurable production performance wins. Ships data-heavy dashboards and touch-first, kiosk-scale interfaces in **React, Next.js, TypeScript, and Vue/Nuxt**, and works across the stack with Node.js, NestJS, and SQL when a feature needs it.

## 02/ CORE SKILLS

**CORE STACK**
React.js, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js

**STATE & DATA**
TanStack Query, Redux, Zustand, Pinia, GraphQL, Apollo Client, REST APIs

**UI & STYLING**
Tailwind CSS, CSS, SCSS, Framer Motion, shadcn/ui, Storybook

**TESTING**
Jest, Vitest, React Testing Library, Playwright

**TOOLING & DEVOPS**
Vite, Webpack, Docker, GitHub, Bitbucket, Jira

**BACKEND**
Node.js, Express.js, NestJS, SQL, Prisma, Redis

**SPECIALTIES**
Design systems, developer experience, touch & kiosk-style UI, gesture handling, virtual keyboards

**AI-ASSISTED DEV**
Claude, Codex, OpenCode, Cursor, GitHub Copilot, ChatGPT, Windsurf

## 03/ EXPERIENCE

### Senior Frontend Engineer / Frontend Lead

MAR 2024 – PRESENT **CURRENT**

**BitBang** · Remote

- Led frontend architecture across multiple fintech and platform products, lifting component reuse, consistency, and maintainability on data-heavy dashboards.
- Led and mentored a team of 7+ frontend engineers — owning code reviews and engineering standards — and redesigned onboarding, cutting new-engineer ramp-up to 2 weeks.
- Owned the **GoPay** frontend, a SADAD-integrated B2B billing platform — public site and operator dashboard (payments, ZATCA invoicing, reconciliations, approvals) — and revamped its Biller dashboard for performance and workflow clarity.
- Initiated **SparkFlow**, an internal Jira-style platform built from team bench time, and helped build it across the React frontend and NestJS/PostgreSQL backend; it **replaced BitBang's Jira subscription** and now runs every team project.
- Built core areas of **Amplifidor**, an influencer-and-brand platform (React, TypeScript, GraphQL): creator profiles, audience insights, and the wallet, plus English/Arabic localization with full RTL.
- Laid the frontend foundation for the **Shamel360** warehouse fulfillment portal (React 19, TanStack Query) and built its inventory stock list and product configuration and approval flows.

- Built an internal UI kit and project-template system with pre-configured tooling and a CLI, cutting new-project setup time and standardizing best practices from day one.
- Drove performance work across data-heavy products: intelligent caching with TanStack Query, end-to-end TypeScript types generated from backend schemas, and virtualization for large lists and tables.
- Delivered tablet-optimized, touch-friendly interfaces for the Kun admin portal, and integrated Persona and Moyasar for secure onboarding and payments.

### Senior Frontend Developer

MAR 2023 – MAR 2024

**Walaplus** · Remote

- Led a full architectural overhaul of the legacy client portal — migrating a server-rendered Blade PHP app to a modern SPA — delivering a multi-fold improvement in navigation speed, maintainability, and UX.
- Built retailer- and partner-facing portals (offers, vouchers, WalaOne operations) and translated Figma design-system foundations into reusable React and Vue components.
- Dockerized frontend projects, helped define stack choices for new products, and interviewed engineering candidates.

### Frontend Developer

JUN 2020 – MAR 2023

**Fatura LLC** · Cairo

- Delivered a React credit-service portal that improved client self-service and day-to-day usability.
- Built an internal Audit Portal in React and TypeScript for monitoring, investigation, and analysis workflows.
- Diagnosed and fixed a major performance issue in the Operations Portal's transaction filters, cutting wait times by ~80% for a portal serving thousands of clients.
- Implemented a Vue Collector Portal for payment-collection workflows, and contributed Node.js and Express.js endpoints and database migrations.

### Frontend Developer (Part-time)

FEB 2022 – NOV 2022

**Scandiweb** · Remote

- Shipped features for e-commerce clients in printer and automotive retail, with targeted performance and engagement work.

### Frontend Developer

FEB 2020 – JUN 2020

**Andalusia Group** · Cairo

- Built the Andalusia Care website in Nuxt and Bootstrap, improving patient access to healthcare services and information.

### Flutter Developer

SEP 2019 – JAN 2020

**Creator X** · Cairo

- Launched a Flutter reservation app that surpassed 1,000 downloads and lifted reservations within its first month.

## 04/ EDUCATION

**Information Technology Institute (ITI)** 2019

Diploma in Systems Development · Egypt

**Pyramids Higher Institute** 2018

B.S. in Communication & Electronics Engineering · Egypt
